

WOLFBANE¹ ALPHA ATTACKED!

153 fy

Last week we told you about WolfBane¹ Alpha being attacked by an unknown force. Now this week a few more details about those attacks.

Brought to you via CommLinks from Dixon's Star, we bring you the only images allowed out of the WolfBane¹ Alpha sector.

We had found out that the PGC were "NOT" the attackers of the WDC. In fact, they have sent reinforcements to the WolfBane¹ Alpha system as a "show of good measure". PGC commented that they are trying to right the wrong between them and the WDC over the years, and want to help the WDC rid the area of this new potential threat to our system.

We have now information about whom or what it is that has attacked WolfBane¹ Alpha 2 weeks ago. A new race has entered the system and attacked WolfBane¹ Alpha for its resources both on the planet and within the WDC. "The WDC has been developing various new weapons systems over the past decade and has kept them secret from the Frontier" - Brim Darkstar stated in a recent press conference.

This strange new race has been described as a Lion-Tiger mix and has been described as very ferocious in nature. "This new race can prove to be a menace to the entire Frontier," stated Mr. Darkstar.

These images are the only ones we have been sent that shows the new race. Mr. Darkstar told this reporter that he hopes that everyone throughout the Frontier takes this new race very seriously and hopes that the Rangers keep control of the situation and pushes the Kzin back to their homeland.

"Kzin" .. so that is the name of the new race. No other info has been provided yet to us from the WDC or the Rangers, other than how wicked in nature they seem to be towards the WDC for its new weapons and planet resources. We hope to have more information in the upcoming weeks and hope that everyone takes this new threat very seriously as Mr. Darkstar had stated!

We also hope to provide more information about their homeland and where it is located. We hope that the Frontier Worlds will also help provide the WDC with anything they need to detain the Kzin.

Stay Tuned for more as this now-becoming-hostile event takes its place in our current peaceful timeline.

1: The Original star system WolfBane (some places also seen as Wolfbane) was renamed to WolfeBane recently. There still may be more sources out there listing the old name. If my name is attached to it, it is this star system and should be referenced accordingly. (Timothy Norris 2014)
